EDUCATION

B. Tech in Data Science (2023–2027)
IES IPS Academy, Indore
CGPA 9+
12th Grade (2022) – Karnataka Vidya Niketan

ABOUT

Data Science undergraduate specializing in Machine Learning, Deep Learning, NLP, and AI-driven backend systems. Experienced in building end-to-end AI solutions for domains including fraud detection, computer vision, and disaster response. Proficient in Python, SQL, ML model deployment, and data analytics, with hands-on experience in government and industry-oriented projects.

WORK EXPERIENCE

THDCIL - Ministry of Power – September 2025 – Present

Working on backend and AI/ML pipelines for secure document verification. Implemented authenticity scoring, forgery detection, and hash-based tamper checks to automate verification workflows.

Data Analytics Virtual Experience, Deloitte Australia (Forage) – April 2025

Completed a simulation involving data analysis and forensic tech; built a Tableau dashboard and used Excel for data classification and business insights.

PROJECTS

Portfolio – Demonstrating all projects

Autonomous Vehicle for Calamity Rescue (AVCR)
– An ML-powered system deployed on Jetson Nano to assess survivability in disaster-hit, confined spaces. Uses real-time sensor data and models like Isolation Forest, LSTM, and Random Forest for detection, prediction, and classification.

Rockfall Prediction & Alert System (Open-Pit Mines) – Developed an ML-based system to predict rockfall risks in open-pit mines using geological and vibration sensor data. Implemented risk-level classification and real-time alerting to enhance worker safety and prevent accidents.

AI-Powered Personal Legal Assistant – Developed a comprehensive web-based AI assistant with document summarization, legal drafting, case strategy advisory, and document classifier to streamline legal workflows.

Amazon Sales ML – Regression model (Python, scikit-learn) predicting sales from discounts; integrated with Power BI. EDA + Power BI dashboard highlighting sales trends, returns, and customer behavior. [link](#)

Subsidy fraud detection – Developed an AI-powered system to detect fraudulent subsidy claims using pattern analysis, anomaly detection, and classification models.

Pothole Detection – Built a computer vision solution using YOLO and OpenCV to detect potholes from street-level images. Aims to support smart infrastructure management and automated road safety monitoring.

ACHIEVEMENTS

Winner – Techno Maths Presentation

Winner – Science Exhibition 2024

Smart India Hackathon (SIH) 2025 Finalist

Winner – VyaparX Idea Pitching Competition

Top 20 – Clear Skies Innovation Challenge

NEC (National Entrepreneurship Challenge)

Finalist

Top 100 Campus Ambassador, IIT Bombay .

Winner – Inter-College Chess Competition 2023

Participations hackathons – Bhartiya Antariksha Hackathon, Hacksungum, GDSC Codespire, Pravah 3.0, Hackdata' 25, Build with India, Samsung Solve for Tomorrow, Flipkart Grid 6.0 (Robotics), Snow Hacks

SKILLS

Programming & Scripting: Python, C, C++, Java (Core)

Machine Learning & AI

Machine Learning, Deep Learning (MLP, CNN, RNN), NLP, LSTM, Random Forest, Isolation Forest

Data & Analytics

SQL, MS Excel, Power BI, Big Data, Data Analysis, EDA, MySQL, PostgreSQL

Computer Vision

OpenCV, YOLO

Web & Backend

Django, Flask, HTML, CSS, Bootstrap, Fast API

Tools & Platforms

Git, GitHub, VS Code, Jetson Nano

Soft Skills Problem-solving, calm under pressure, leadership, Presentations

CERTIFICATION

Java Tutorial (IIT Bombay)

RDBMS PostgreSQL

Python Tutorial (IIT Bombay)

LEADERSHIP AND EXTRACURRICULARS

Founder – E-Cell, IES IPS Academy

Event Lead – CoinDCX

Core Member – Bad Talks
